

BEFARD XR series 500

VACUUM CLAMP FOR PANELS ROOF AND WALL

VACUUM CLAMP BEFARD XR 500

The BEFARD XR 500 vacuum gripper has been designed to work in various conditions. Its construction allows for individual configuration thanks to the possibility of changing the spacing and the number of suction cups.

SPECIFICATION

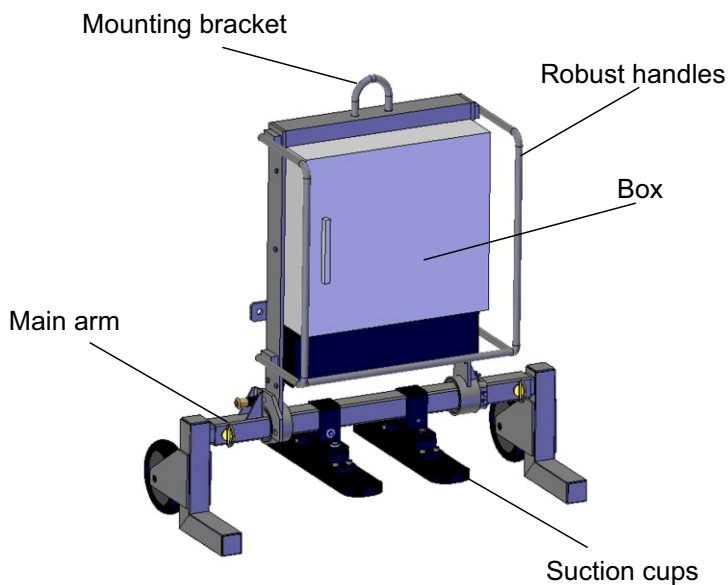

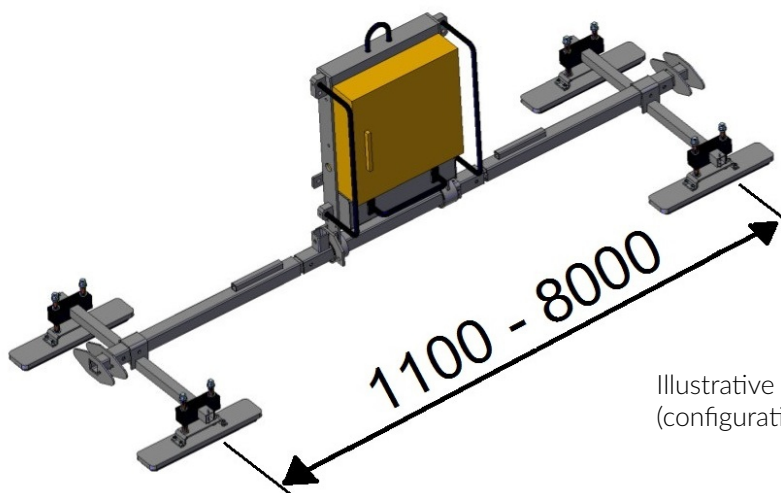

The gripper is designed for carrying and assembling:

- Horizontal and vertical wall panels up to 15m long (depending on the filling of the boards),
- Roof panels up to approx. 20 meters long (depending on the filling of the boards)
- Other panels, e.g. with a sinusoidal profile (specially adapted suction cups)

TECHNICAL DATA

Capacity (depending on the number of suction cups)	8 pcs * 75 kg = 600 kg
Power	Built-in rechargeable battery (2x 12 V)
Vacuum	<ul style="list-style-type: none">- audible warning about weak vacuum level- large vacuum tank- integrated measuring device
Weight	225 kg (depending on configuration)
